## Workshop topics:

- Innovative flood risk management
- Impact assessment of land use and climate change on water related resources and hazards
- Environmental modelling
- Climate change adaptation
- Civic capacity and inclusive participatory concepts

The thematic focus of this workshop is to exploit knowledge and innovation potential towards increasing the resilience of urban areas and their surroundings to impacts of climate change on water resources and water related risks such as floods and flash floods. In addition to the assessment of extreme events and their impacts, focus will be set on increasing resilience and adaptive capacity to climate change effects by integrative strategic approaches.

Expected workshop result is to develop ideas and find partners for Horizon proposals.
